

- Baby Nurse – An infant specialist, who may or may not be an RN or LPN, and who helps couples manage and enjoy the first several weeks at home with their newborn baby.
 - Organize the nursery.
 - Change diapers, bathe, and feed baby.
 - Manage baby's schedule, putting baby on a routine as appropriate.
 - Identify health and other issues, and implement appropriate techniques to address or recommend medical attention.
 - Assist during nighttime feedings, supporting both breast- and bottle-feeding.
 - Do baby's laundry, perform light housekeeping and meal preparation.
